

## **OPERATIONS**

Smiths Falls Fire Department has been an integral part of Smiths Falls since 1852. In the early days all that was expected of the fire brigade was to fight fires. Today, we have expanded our services to include:

### **Fire Suppression**

Structural, vehicles, brush, aircraft.

### **Emergency Medical Life-Threatening incident**

Heart attacks, collapses, traumas, Naloxone administration.

### **Hazardous Materials incidents**

Hazardous material spills

### **Motor Vehicle Accidents**

Extinguish fires, extricate victims,  
provide medical assistance.

### **Public Service Calls**

Carbon monoxide alarms, downed hydroelectric lines, flood

## **Apparatus**

### Pumper 820

This pumper is the for the most majority of the time is the first responding unit to any emergency. This vehicle is used for fire suppression and general rescue.

### Aerial 810

This apparatus is used for elevated rescue and firefighting. It is the 2<sup>nd</sup> truck out for incidents within the town limit. This unit can also be used as a fire pumper. This unit is the first truck out for any motor vehicle collision as it contained the vehicle extrication equipment. The aerial length is 115'.

### Tanker 830

This unit is used for water supply for rural incidents and for any incident in the town limit where there are no hydrants.

### Rescue 840

This apparatus is used to support fire operations. This unit is used has Breathing Air unit. This units contained all the Haz Mat Equipment, Salvage and Overall equipment and all the equipment required for fire investigation.

Truck 870

This unit is used as a support vehicle and also used by the Officers.

Car 871

This unit is used by the Fire Chief
