

# Notice of Public Open House Beckwith Street Redevelopment Plan

Thursday, November 23, 2017

6:00pm to 8:00pm

**Smiths Falls Memorial Community Centre, 71 Cornelia Street  
Youth Arena Hall (Upstairs)**

The Town of Smiths Falls has initiated the Beckwith Street Redevelopment Plan that includes the preparation of a streetscape functional design for the renewal of Beckwith Street in the downtown core. The study area includes Beckwith Street between Elmsley Street and Chambers Street as shown on the key map below. The renewal of Beckwith Street will implement the vision established in the 2013 Council-approved *Downtown Revitalization and Waterfront Integration Plan*, which provides design guidance for the reconstruction of Beckwith Street.

The Beckwith Street Redevelopment Plan will address the various demands of the street:

- Determine the street's lane arrangement, including turn lanes;
- Determine the on-street parking arrangement;
- Determine sidewalk and crosswalk widths and accessibility provisions;
- Determine cycling provisions including bicycle parking;
- Understand, at a basic level, the below-grade services and utilities that might inform street designs;
- Determine locations for potential public places and enhanced streetscape areas; and
- Develop potential streetscape themes and directions.

**An Open House is being held on November 23 to review and discuss the draft plans for Beckwith Street with residents and solicit feedback.**

Interested persons can provide comments throughout the study process. Any comments received, with the exception of personal information, will become part of the public record. Information about the study is also available on the Town's website.
