

About the CIP

A CIP is a tool that municipalities in Ontario can use to stimulate or support economic activity in accordance with local and priorities. The requirements for a CIP are outlined under Section 28 of the Planning Act. Municipalities have the authority to establish financial incentives under the CIP to encourage certain types of development or improvements within Community Improvement Project Area (CIPA). These financial incentive programs allow the municipality to direct funds to the CIPA for certain initiatives in accordance with the goals of the CIP. The Smiths Falls CIP includes municipal grants, loans, and/or rebates for private sector improvements that stimulate accessible improvements, affordable housing, brownfield redevelopment and downtown and waterfront revitalization. The CIP offers a total of 15 financial incentive programs that may be activated in any given year depending on the current needs of our community.

Benefits of the CIP

Community Improvement Plans provide many community benefits by:

- Stimulating private sector investment in the community through grants and loans from the Municipality;
- Promoting revitalization and place-making to attract tourism, business investment and economic development opportunities;
- Developing affordable housing;
- Promoting brownfield redevelopment (contaminated property);
- Enhancing streetscapes and building façades; and
- Encouraging the effective use of community infrastructure.
