Media Release # 1

Short Term Restrictions – Drinking Water System

March 12, 2018 @ 2:50 pm

To: All Residents/Businesses of the Town of Smiths Falls

The Town has experienced a break. This break has been isolated. The Water Plant will be refilling system reservoirs over the next several hours. We have been in consultation with the Leeds Grenville & Lanark District Health Unit. Town residents are advised that there are no concerns regarding drinking water quality, however residents are asked to please limit any non-essential use of Town water until further notice.

You may experience some fluctuations in pressure and/or light discoloration of water.

We thank everyone for their patience and cooperation.

Please stay tuned to the Town's webpage (www.smithsfalls.ca) and our Facebook page for updates.
