

THE TOWN OF SMITHS FALLS

NOTICE OF PUBLIC INFORMATION CENTRE

TOWN OF SMITHS FALLS

Schedule 'B' Municipal Class Environmental Assessment

POTABLE WATER STORAGE

The Town of Smiths Falls (the Town) is undertaking a planning process to assess alternative potable water storage solutions for the Town. While the Town's potable water supply system has been operating in accordance with all applicable legislation and is achieving all required water quality standards, the Town does not currently meet potable water storage requirements as defined by the Ministry of the Environment and Climate Change. Notwithstanding this, the Town's current elevated potable water storage tank, at 90 years old, is in need of refurbishment or replacement and therefore the Town is in need of a solution that will address water storage constraints now and for the next 20 years and beyond.

WE WANT TO HEAR FROM YOU!

Public consultation is a key component to this Study. The proposed consultation plan provides for a single Public Meeting to review the future servicing alternatives that are being considered as part of this project. This Public Information Centre will identify existing system constraints and potential alternative solutions. The 'preferred alternative' currently being considered envisions decommissioning the existing potable water storage tank and constructing a new elevated storage tank near the northeastern extents of Smiths Falls, ON, located at Air Care Drive.

The Public Information Centre is scheduled as follows:

Date: Tuesday, June 12, 2018
Time: Open House from 5:00 – 7:00 p.m.
Location: Smiths Falls Curling Club
Address: 13 Old Slys Road, Smiths Falls, ON

All those interested in the project are urged to attend. Project information will also be available to the public at the Municipal office and on the Town's website, www.smithsfalls.ca.
